## EXPERIENCES

Volunteer Chemistry Teacher  
Türk Kızılayı | 09.2020 - 06.2022

Role : As a volunteer chemistry teacher at Turk Kizilayi, I taught YKS chemistry lessons to student groups as determined by the Turk Kizilayi

## EDUCATION

Information Management Systems  
Anadolu University | 2022 -

Chemistry Teaching  
Gazi University Education Faculty | 2017 - 2021  
Grade : 3.19/4.00 (High Honors Certificate)

## SKILLS

Linux

Javascript

ReactJS

Git

SQL

HTML & CSS

Bootstrap

Software Test

## COURSES AND CERTIFICATIONS

---

• Turkcell Geleceği Yazarlar	React 101   201   301   401
• BeyazNet	ISACAMP-BlueTeam 2022-2 / IT security Architect Camp
• BTK Akademi	Cyber Security Analyst Training
• Turkcell Geleceği Yazarlar	HTML & CSS
• Kodluyoruz	Kodluyoruz İstanbul Front-End Bootcamp (K140)
• BTK Akademi	API and API Test
• Patika.dev - Orion	Orion Innovation Turkey Angular Bootcamp Asisstan
• Patika.dev - Inavitas	React Native Bootcamp
• Patika.dev - Kodluyoruz	Frontend Web Development Patikası
• Mustafa Akgül Özgür Yazılım	Linux Winter Camp
• BTK Akademi	Zero-Forward Python Programming
• BTK Akademi	Project management
• BTK Akademi	Basic Network Technologies

## ABOUT SKILLS

---

Through a number of training sessions and bootcamps, I have honed my **Reactjs** abilities to an intermediate-advanced level. I have written several programs at the beginner level. Most recently, I was able to earn a certification at the 401 level by completing four different training programs on the Turkcell Geleceği Yazarlar

**Linux** operating systems are ones I have used extensively, both due to the influence of the winter camp I attended and because one of my devices at home is Linux. (My most frequently used ones are Mint and Ubuntu.)

My first experience with **Git** was through the frontend track on patika.dev. Since I progressed by uploading and updating my assignments there, I am proficient in Git. I currently use **Github** for my current projects.

I have a good understanding of **Html**, I can complete any desired work to a nearly advanced level. You can review my work on Github.

I have prepared many projects and assignments with **Css** and **Bootstrap**, you can access them from my Github account.

Through the training I have received in **Software Testing**, I have learned both the structure of APIs and how to test them. I have also learned manual testing methods.

I have basic knowledge of **SQL**. I have previously worked with PostgreSQL.
